H2Odysey is proud to offer a full-range of Aluminum Cylinders. Our large Aluminum 80's are made by Worthington Cylinders at their state-of-the-art facility in New Albany, Mississippi. Worthington Cylinders has grown to become the leading global supplier of pressure tanks and cylinders.

## Aluminum Tanks

- Lightweight, high strength 6061-T6 alloy
- Service Pressure 3000 psi / 207 Bar
- Oxygen compatible provided that an O2 compatible tank valve is used.
- Colors:
  - T80 = Black, Blue, SB
  - T40 = Sand Blast, BNC
  - T19 = Yellow
  - T13 = Yellow
  - T6 = Yellow

# MORE AIR TO SPARE

The worlds first choice for redundant breathing systems

H2Odysey has been supplying the diving industry since 1986 and has built a solid reputation. In 2003 the Extra Air Source was invented making it the first combination tank valve/first stage that can be used on different size tanks.

## EXTRA AIR SOURCE 3

- RG3V is a balanced diaphragm 1st stage w/environmental seal
- RG8 2nd stage connects via vertical/horizontal swivel
- Available in kits which include:
  - 1st & 2nd stage
  - 6 cuft tank
  - Yoke, DIN, or station filler
  - Quick release bag
  - GPD button gauge (optional)

EAS3-KY - Yoke fill kit

EAS3-KS - Station fill kit

EAS3-KD - Din Fill Kit

## EXTRA AIR SOURCE 2

- RG2V is a standard piston 1st stage
- RG8 2nd stage connects via vertical/horizontal swivel
- Available in kits which include:
  - 1st & 2nd stage
  - 6 cuft tank
  - Yoke, DIN, or station filler
  - Quick release bag
  - GPD button gauge (optional)

EAS6-KY - Yoke fill kit

EAS6-KS - Station fill kit

EAS6-KD - Din fill kit

Store Display Available

Our modular Redundant Air Systems —RAS allows a choice of two different 1st stages and 2nd stages along with the appropriate tank and mounting bag suitable for the divers safety. The quick disconnect allows the hose to be easily removed from the 1st stage for storage.

- Our Magnum Air System is an environmentally sealed balanced diaphragm 1st stage with a choice of two different 2nd stages.
- The Strata Air System has a standard piston 1st stage with a choice of two different second stages.
- Low pressure quick disconnect allows for detachment of hose and 2nd stage from 1st stage.
- Fits any standard aluminum, or steel tank
- Available in kits which include:
  - 1st & 2nd stage
  - 13 or 19 cuft tank
  - Station Filler
  - Secure tank mount bag (DB13 or DB19)
  - GPD Button Gauge (optional)

**RAS1** - RG8 2nd Stage \*pictured

**RAS2** - RX0 2nd Stage

*The RAS system can be used with all tank sizes, which makes it the perfect system to be used by Public Safety Divers...*

*It is so easy to configure, it makes sense why so many professional divers use this instead of a traditional octopus.*

From our redundant breathing systems to our low profile drysuit inflation system, the RG-2V and RG-3V have proven to be the desired choice of diving professionals.

OPRV-REG

Our high performance Elite RXE regulator set is the perfect balanced piston regulator to take you to depth while maintaining excellent work of breathing characteristics. The Sprint RXL is a proven “workhorse” regulator with a balanced diaphragm 1st stage that is very easy to maintain.

## RXE

## Elite

- Balanced piston 1st stage -consistent airflow, regardless of depth
- Nitrox Ready
- Available in Yoke / DIN
- 4 LP & 2 HP ports
- LP port swivel
- High performance balanced 2nd stage
- Diver adjustable inhalation resistance
- 30” black Rhino hose

## Elite<sup>OCTO</sup>

- High performance downstream 2nd stage
- Dive / Pre-dive switch
- 40” black Rhino hose
